

# Dozer Blade

The Brute Dozer Blade is a heavy duty, full hydraulic tilt and angle that will make quick work of your job. Over built, designed and tested on a large loader and various skid steers, this blade is built to

last no matter what the machine. Featuring a 5/16" face plate gusseted throughout with a reversible and replaceable bolt on cutting edge this blade is made to take a beating. This blade comes standard with a push button momentary switch to toggle from angle to tilt for easy use with any machine without any modification. It is also available with direct wiring for your machine through the external electric plug! Fully equipped with hoses, cylinders and flat face couplers everything you need to get on the job. Available in 6', 7' and 8' widths!
