

R

R55PD Post Driver

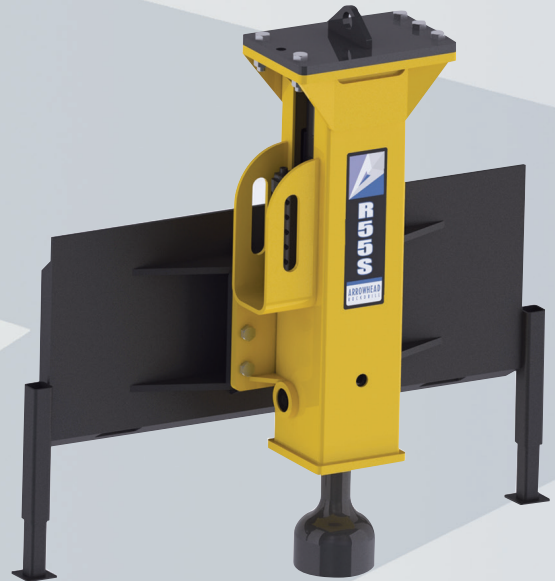

Arrowhead Rockdrill's gas fired hydraulic post driver sets a new standard in performance and productivity for today's increasingly competitive fence building industry. By reducing the time taken to set each post you can do more with less by using an impact technology that Arrowhead Rockdrill has developed and refined over the past 30 years. A simple, powerful and reliable power cell manufactured by a world leading impact technology business built with compact equipment in mind makes the RS series post driver the best choice for your post driving needs on skid/track loaders, compact excavators or backhoe loaders. All RS series post drivers are backed by an industry leading sales, service and support network to keep you working longer for less maximizing your all important return on investment.
