

Diesel Exhaust Fluid (DEF) converts nitrogen oxide into harmless nitrogen and oxygen, thereby, helping the environment by reducing harmful emissions in the air.

AFI offers DEF delivery systems fabricated under strict quality control in compliance with ISO 22241 standards.

FEATURES:

- *Completely closed dual pumping system keeps contaminants out.*
- *Micro Matic coupler simplifies filling and emptying.*
- *100 gallon polypropylene DEF tank with two fuel surge baffles.*
- *25' x 3/4" hose with auto-retracting reel.*
- *8 gallon per minute pump.*
- *ISO 22241 compliant.*
- *Available on all new 750 and 950 gallon fuel trailers.*
- *Also available as a Portable DEF System.*

The AFI DEF Module combines safety and convenience to handling DEF, providing a mobile unit that will fit on the AFI Fuel Trailer, a Service Trailer, or in the back of a pickup truck.

CUSTOMIZED FUEL & SERVICE TRAILERS

A DEF Unit can be added to your AFI Fuel Trailer or Service Trailer at the time of purchase or at a later time, when it's most convenient for you.

PORTABLE DEF STORAGE & DISPENSING UNIT

A Portable DEF System is mounted on a heavy duty steel frame which includes fork pockets for easy loading and transport in the bed of your pickup truck.

Completely Closed Dual Pumping System allows filling and emptying the DEF tank with one pump while preventing contaminants from entering the system.

The Nozzle is easily removed by way of a quick coupler and replaced with a Micro Matic coupler, enabling users to conveniently fill the DEF Module from a DEF Tote by simply turning a valve.
